

LAB#8

- 1- (5 pts) Ask the user to enter integers until the user enters 0. Then the program stops and prints the minimum of the entered numbers. Below is the example:

Enter an integer: 21

Enter an integer: -1

Enter an integer: 22

Enter an integer: 0

Min: -1

- 2- (5 pts) Translate the below C Code to Assembly and then, execute the assembly program and report the results.

```
for (int i=0; i< 5; i++){  
    if (i<=3)  
        print("%d", i)  
}
```
